IMPORTANT NOTICE

Please note that this material contains the opinions of the manager as of the date noted, and may not have been updated to reflect real time market developments. All opinions are subject to change without notice.

Executive summary

Past performance does not predict future results.

Portfolio Performance

Over the quarter, the GIS Global Low Duration Real Return Fund (institutional share class, after fees) posted positive absolute returns of 1.13% and outperformed its benchmark. Contributors include the Fund's positioning in Eurozone interest rates, exposure to Non-agency and U.S. agency MBS and overweight exposure to U.S. breakeven inflation and selection in Eurozone breakeven inflation. Detractors include the Fund's U.S. interest rate strategies.

CONTRIBUTORS

- Positioning in Eurozone interest rates
- Off-benchmark exposure to Non-agency and U.S. agency MBS
- Overweight exposure to U.S. breakeven inflation and selection in Eurozone breakeven inflation

DETRACTORS

- U.S. interest rate strategies

Performance periods ended 31 Mar '24	3 mos.	6 mos.	1 yr.	3 yrs.	5 yrs.	10 yrs.	SI
Fund before fees	1.25	4.40	5.01	3.31	4.00	2.77	2.78
Fund after fees	1.13	4.15	4.49	2.80	3.49	2.26	2.28
Benchmark*	0.49	3.33	3.34	2.73	3.22	2.23	2.18

Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.

The following information should be read in conjunction with the 12-month rolling past performance information provided later in this presentation

Portfolio strategy

Interest rates: The Fund moved to an overall duration underweight sourced in the U.S. given stronger growth and inflation momentum in recent months. Preference for Global vs U.S. duration, expressed through a marginal overweight in U.K. and Australian duration because CB policies there have passed-through to the real economy faster given variable mortgage rates. This is also aimed to increase global diversification.

Reflation: We maintain an overweight to U.S. breakevens as long-term inflation expectations are still well anchored despite inflation staying above the Fed's target, and perhaps even accelerating a bit in the near term.

Relative value: Selective in curve positioning across rates and breakeven inflation. Within U.S. TIPS, we favor the 7yr and 10yr portion of the curve given compelling relative values.

Spread sectors: Maintain exposure to select high-conviction spread sectors, including U.S. agency and non-agency MBS.

Fund specific risks

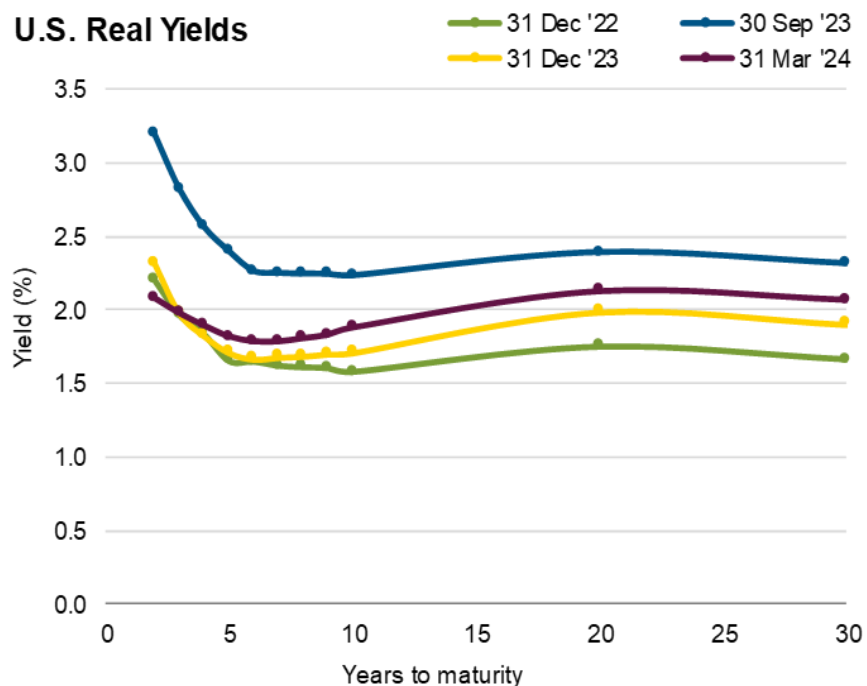

Risk	Risk Description
Credit and Default Risk	A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.
Currency Risk	Changes in exchange rates may cause the value of investments to decrease or increase.
Derivatives and Counterparty Risk	The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.
Fixed Income Risk	There is a risk that the institution which issued the securities will fail, which would result in a loss of income to the fund. Fixed income values are likely to fall if interest rates rise.
Liquidity Risk	Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.
Interest Rate Risk	Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).
Mortgage Related and Other Asset Backed Securities Risks	Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

ESG Investment Risk

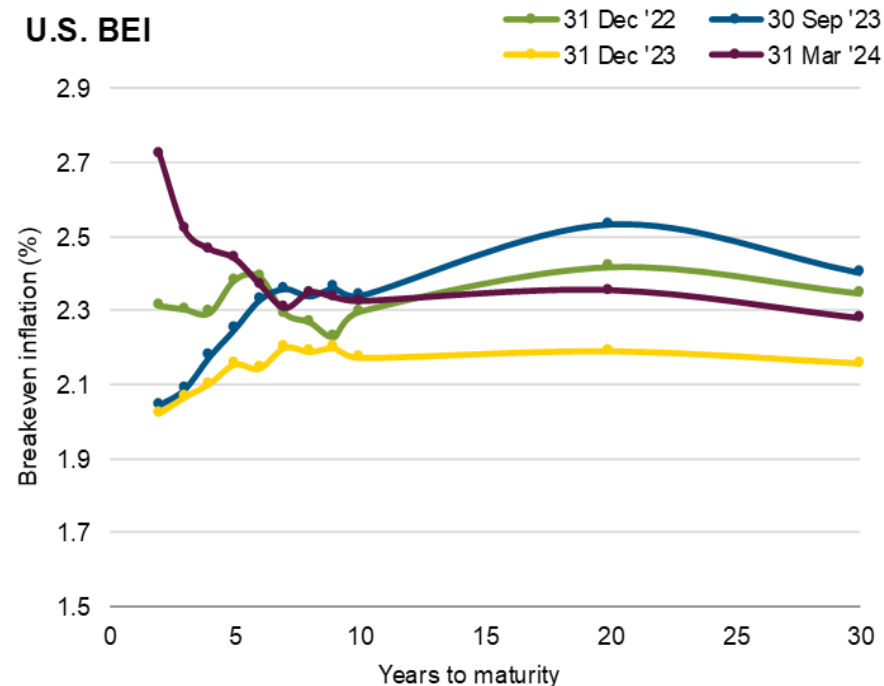

- At PIMCO, we define ESG Integration as the consistent consideration of material ESG factors into our investment research process to enhance our clients' risk-adjusted returns. Material ESG factors may include but are not limited to: climate change risks, social inequality, shifting consumer preferences, regulatory risks, talent management or misconduct at an issuer, among others.
- We recognize that ESG factors are increasingly essential inputs when evaluating global economies, markets, industries and business models. Material ESG factors are important considerations when evaluating long-term investment opportunities and risks for all asset classes in both public and private markets.
- Integrating ESG factors into the evaluation process does not mean that ESG information is the sole or primary consideration for an investment decision; instead, PIMCO's portfolio managers and analyst teams evaluate and weigh a variety of financial and non-financial factors, which can include ESG considerations, to make investment decisions. The relevance of ESG considerations to investment decisions varies across asset classes and strategies.
- The Fund's ESG investing strategy may select or exclude securities of certain issuers for reasons other than financial performance. Such strategy carries the risk that the Fund's performance will differ from similar funds that do not utilize an ESG investing strategy. For example, the application of this strategy could affect the Fund's exposure to certain sectors or types of investments, which could negatively impact the Fund's performance.
- There is no guarantee that the factors utilized by the Investment Advisor will reflect the opinions of any particular investor, and the factors utilized by the Investment Advisor may differ from the factors that any particular investor considers relevant in evaluating an issuer's ESG practices.
- Future ESG development and regulation may impact the Fund's implementation of its investment strategy. In addition, there may be cost implications arising from ESG related due diligence, increased reporting and use of third-party ESG data providers.

Quarter in Review

Real yields sold-off across maturities outside of the front-end in Q1, while inflation expectations rose across the curve

U.S. real yields climbed higher across the curve in Q1, outside of the front-end of the curve which rallied. The Fed held rates steady in January and March while exuding a more dovish tone in a commitment to rate cuts commencing around mid-year. TIPS delivered modestly negative returns, but outperformed comparable nominal Treasuries in Q1 '24.

U.S. breakevens moved higher across maturities in Q1. Core CPI remained sticky ~4% (y/y) supported by core services inflation and sticky shelter prices. The Fed categorized the recent uptick in inflation as noise and continued to maintain a high bar for further rate hikes despite resilient employment and growth data.

SOURCE: Bloomberg

Market Summary

Q1 '24: Global ILB returns were modestly negative as real rates sold-off outside of front-end maturities which rallied

Contributors include the Fund's positioning in Eurozone interest rates, exposure to Non-agency and U.S. agency MBS and overweight exposure to U.S. breakeven inflation and selection in Eurozone breakeven inflation. Detractors include the Fund's U.S. interest rate strategies.

U.S. real interest rates

U.S. real yields climbed higher outside of the front-end of the curve, which rallied in Q1. The Fed held interest rates unchanged in January and March, while continuing to signal a high bar for further rate hikes and downplaying the recent reacceleration inflation or resilience in the labor markets as “bumps.” Expectations are for rate cuts to commence in mid-2024.

U.S. breakeven inflation expectations

In January, U.S. inflation expectations broadly rose across the curve as the Fed indicated a rate cut in March was not likely. U.S. breakevens again moved higher in February as the Fed's tone turned more hawkish, emphasizing patience with cutting rates this year. In March, U.S. breakevens were roughly unchanged as the Fed dovishly reaffirmed their commitment to cutting rates by categorizing the recent inflation uptick as nosy and dismissing questions about the strength in the labor market.

Global inflation-linked bonds (ILBs)

Global ILB markets delivered marginally negative returns as real yields rose across countries given the repricing of rate cut expectations for later in 2024. Eurozone breakevens increased slightly despite declining inflation. U.K. breakevens rose across the curve due to surprising U.K. GDP growth in January. Both the ECB and BoE expressed confidence that inflation would continue to moderate amid declining wage growth, which reaffirmed market expectations that rate cuts would occur as soon as June 2024.

Returns of key global ILB markets (In USD, unhedged)

SOURCE: Bloomberg Inflation-Linked Bond Country Indices.

Investment implications: Opportune time to consider going active in global fixed income

Look global

Greater-than-usual focus on bond markets outside of the U.S.

Lock in elevated yields

Intermediate maturities can offer a “sweet spot” with markets expecting cash rates to fall

Favor high quality

Up-in-quality bias in both public and private credit markets

Go active

Differentiated macro paths present compelling opportunities for active investors

Portfolio Outlook

Strategic outlook

Higher savings balances and a slower pass-through of monetary policy in the U.S. relative to other developed markets could, in our view, keep inflation above the Fed's 2% target over the cyclical horizon. We still expect the Fed to start normalizing policy at midyear, similar to other DM central banks; however, the Fed's subsequent rate-cutting path could be more gradual. Additionally, we believe that an economic soft landing is achievable, but both recessionary and inflationary risks remain elevated in the aftermath of unprecedented global shocks to supply and demand.

Key strategies

Interest rates

The Fund moved to an overall duration underweight sourced in the U.S. given stronger growth and inflation momentum in recent months. Preference for Global vs U.S. duration, expressed through a marginal overweight in U.K. and Australian duration because CB policies there have passed-through to the real economy faster given variable mortgage rates. This is also aimed to increase global diversification. We maintain a 10s/30s curve steepener in the U.S. and Eurozone, one of our highest conviction views. We continue to be selective within curves and securities depending on prevailing valuations and market events.

Relative value

The strategy remains tactical in terms of curve and country positioning based on relative value and roll-down opportunities. We seek to exploit attractive security mispricings and market dislocations.

Reflation

We remain overweight to U.S. breakevens as long-term inflation expectations are still well anchored despite inflation staying above the Fed's target, and perhaps even accelerating a bit in the near term. Maintain an underweight/short position in Eurozone breakevens given EUR HICP is still rich and less attractive than U.S. breakevens (relative value view). We still prefer to have a positive percentage market value exposure. We maintain modest overweight positions in select global ILBs, including Japanese linkers given they lagged global recovery initially and provide asymmetric payoff opportunities.

Spread sectors

We remain cautious overall within generic corporate credit. We prefer U.S. agency and non-agency MBS given attractive valuations and yield pickup. Within currencies, we seek alpha opportunities via an FX relative value carry strategy in DM and liquid EM FX.

Note: EUR HICP is the harmonized index of consumer prices (HICP), used primarily within the European Union. It is a measure of prices paid by consumers for a market basket of goods and services. It is calculated using the same methodology across countries to allow for comparable measures of inflation. The yearly (or monthly) growth rates represent the inflation rate.

This communication is not a public offer and individual investors should not rely on this document. Opinion and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. We believe the information provided here is reliable, but do not warrant its accuracy or completeness.

For qualified investor use only

The information provided herein does not constitute an offer of the product incorporated in Ireland, in Switzerland pursuant to the Swiss Federal Law on Financial Services ("FinSA") and its implementing ordinance. This is solely an advertisement pursuant to FinSA and its implementing ordinance for the product. Swiss representative and paying agent : BNP PARIBAS, Paris, Zurich branch, Selnastrasse 16, 8002 Zurich, Switzerland. The prospectus, articles of association, Key Information Document(s) and annual and semi-annual financial reports of the product may be obtained free of charge from the Swiss representative.

Additional Information/Documentation

A Prospectus is available for PIMCO Funds and UCITS Key Investor Information Documents (KIIDs) (for UK investors) and Packaged retail and insurance-based investment products (PRIIPS) key information document (KIDs) are available for each share class of each the sub-funds of the Company. The Company's Prospectus can be obtained from www.fundinfo.com and is available in English, French, German, Italian, Portuguese and Spanish. The KIIDs and KIDs can be obtained from www.fundinfo.com and are available in one of the official languages of each of the EU Member States into which each sub-fund has been notified for marketing under the Directive 2009/65/EC (the UCITS Directive). In addition, a summary of investor rights is available from www.pimco.com. The summary is available in English. The sub-funds of the Company are currently notified for marketing into a number of EU Member States under the UCITS Directive. PIMCO Global Advisors (Ireland) Limited can terminate such notifications for any share class and/or sub-fund of the Company at any time using the process contained in Article 93a of the UCITS Directive.

PERFORMANCE AND FEE

Past performance is not a guarantee or a reliable indicator of future results. The "gross of fees" performance figures, if included, are presented before management fees and custodial fees, but do reflect commissions, other expenses and reinvestment of earnings. The "net of fees" performance figures reflect the deduction of ongoing charges. All periods longer than one year are annualized.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

Outlook

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions or are appropriate for all investors and each investor should evaluate their ability to invest for the long term, especially during periods of downturn in the market. Outlook and strategies are subject to change without notice.

Portfolio structure is subject to change without notice and may not be representative of current or future allocations.

Forecasts, estimates and certain information contained herein are based upon proprietary research and should not be interpreted as investment advice, as an offer or solicitation, nor as the purchase or sale of any financial instrument. Forecasts and estimates have certain inherent limitations, and unlike an actual performance record, do not reflect actual trading, liquidity constraints, fees, and/or other costs. In addition, references to future results should not be construed as an estimate or promise of results that a client portfolio may achieve.

Important Disclosures

Benchmark

Unless referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark or index in this material is not used in the active management of the Fund, in particular for performance comparison purposes.

Where referenced in the prospectus and relevant key investor information document /Key Information Document a benchmark may be used as part of the active management of the Fund including, but not limited to, for duration measurement, as a benchmark which the Fund seeks to outperform, performance comparison purposes and/or relative VaR measurement. Any reference to an index or benchmark in this material, and which is not referenced in the prospectus and relevant key investor information document /Key Information Document, is purely for illustrative or informational purposes (such as to provide general financial information or market context) and is not for performance comparison purposes. Please contact your PIMCO representative for further details.

The fund is actively managed in reference to the Bloomberg World Government Inflation-Linked Bond 1-5 Year USD Hedged Index as further outlined in the prospectus and key investor information document /Key Information Document.

Correlation

As outlined under "Benchmark", where disclosed herein and referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark may be used as part of the active management of the Fund. In such instances, certain of the Fund's securities may be components of and may have similar weightings to the benchmark and the Fund may from time to time show a high degree of correlation with the performance of any such benchmark. However the benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.

Investors should note that a Fund may from time to time show a high degree of correlation with the performance of one or more financial indices not referenced in the prospectus and relevant key investor information document /Key Information Document. Such correlation may be coincidental or may arise because any such financial index may be representative of the asset class, market sector or geographic location in which the Fund is invested or uses a similar investment methodology to that used in managing the Fund.

Sustainable Finance Disclosure Regulation (SFDR) Categorization: Article 8

SFDR Categorization sets out how the fund is categorized for the purposes of Regulation (EU) 2019/ 2088 on Sustainability-related Disclosures in the Financial Services Sector (SFDR) Article 8 Funds promote, among other characteristics, environmental or social characteristics. Further details are set out in the Prospectus and relevant Fund Supplement.

GIS Funds

PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. The information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law. The information contained in this communication is intended to supplement information contained in the prospectus for this Fund and must be read in conjunction therewith. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Fund's prospectus. Please read the prospectus carefully before you invest or send money. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Returns are net of fees and other expenses and include reinvestment of dividends. The performance data represents past performance and investment return and principal value will fluctuate so that the PIMCO GIS Funds shares, when redeemed, may be worth more or less than the original cost. Potential differences in performance figures are due to rounding. The Fund may invest in non- U.S. or non-Eurozone securities which involves potentially higher risks including non-U.S. or non-Euro currency fluctuations and political or economic uncertainty. For informational purposes only. Please note that not all Funds are registered for sale in every jurisdiction. Please contact PIMCO Europe Ltd for more information. For additional information and/or a copy of the Fund's prospectus, please contact the Administrator: State Street Fund Services (Ireland) Limited, Telephone +353-1-776-0142, Fax +353-1-562-5517. ©2024.

Investment restrictions —In accordance with the UCITS regulations and subject to any investment restrictions outlined in the Fund's prospectus, the Fund may invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by any of the following: OECD Governments (provided the relevant issues are investment grade), Government of Singapore, European Investment Bank, European Bank for Reconstruction and Development, International Finance Corporation, International Monetary Fund, Euratom, The Asian Development Bank, European Central Bank, Council of Europe, Eurofima, African Development Bank, International Bank for Reconstruction and Development (The World Bank), The Inter American Development Bank, European Union, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Student Loan Marketing Association (Sallie Mae), Federal Home Loan Bank, Federal Farm Credit Bank, Tennessee Valley Authority, Straight-A Funding LLC, Government of the People's Republic of China, Government of Brazil (provided the issues are of investment grade), Government of India (provided the issues are of investment grade).

Important Disclosures

A word about risk: Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. **Inflation-linked bonds (ILBs)** issued by a government are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation; ILBs decline in value when real interest rates rise. Sovereign securities are generally backed by the issuing government, obligations of U.S. Government agencies and authorities are supported by varying degrees but are generally not backed by the full faith of the U.S. Government; portfolios that invest in such securities are not guaranteed and will fluctuate in value. Investing in **foreign denominated and/or domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. **Mortgage and asset-backed securities** may be sensitive to changes in interest rates, subject to early repayment risk, and their value may fluctuate in response to the market's perception of issuer creditworthiness; while generally supported by some form of government or private guarantee there is no assurance that private guarantors will meet their obligations. **High-yield, lower-rated, securities** involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. **Equities** may decline in value due to both real and perceived general market, economic, and industry conditions. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. **Diversification** does not ensure against loss.

PIMCO Europe Ltd (Company No. 2604517, 11 Baker Street, London W1U 3AH, United Kingdom) is authorised and regulated by the Financial Conduct Authority (FCA) (12 Endeavour Square, London E20 1JN) in the UK. The services provided by PIMCO Europe Ltd are not available to retail investors, who should not rely on this communication but contact their financial adviser. **PIMCO Europe GmbH (Company No. 192083, Seidlstr. 24-24a, 80335 Munich, Germany), PIMCO Europe GmbH Italian Branch (Company No. 10005170963, via Turati nn. 25/27 (angolo via Cavalieri n. 4), 20121 Milano, Italy), PIMCO Europe GmbH Irish Branch (Company No. 909462, 57B Harcourt Street Dublin D02 F721, Ireland), PIMCO Europe GmbH UK Branch (Company No. FC037712, 11 Baker Street, London W1U 3AH, UK), PIMCO Europe GmbH Spanish Branch (N.I.F. W2765338E, Paseo de la Castellana 43, Oficina 05-111, 28046 Madrid, Spain) and PIMCO Europe GmbH French Branch (Company No. 918745621 R.C.S. Paris, 50–52 Boulevard Haussmann, 75009 Paris, France)** are authorised and regulated by the German Federal Financial Supervisory Authority (BaFin) (Marie-Curie-Str. 24-28, 60439 Frankfurt am Main) in Germany in accordance with Section 15 of the German Securities Institutions Act (WpIG). Important Disclosures

Acronyms and definitions of investment terms used throughout the report:

Alpha is a measure of performance on a risk-adjusted basis calculated by comparing the volatility (price risk) of a portfolio vs. its risk-adjusted performance to a benchmark index; the excess return relative to the benchmark is alpha.

Average coupon is the average of the coupon payments of the underlying bonds within the portfolio.

Average effective maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

"Bend-but-not-break" refers to credits that PIMCO would not expect to default in a credit-stressed environment.

Beta is a measure of price sensitivity to market movements. Market beta is 1.

Breakeven inflation rate (or expectation) is a market-based measure of expected inflation or the difference between the yield of a nominal and an inflation-linked bond of the same maturity.

Carry is the rate of interest earned by holding the respective securities.

The terms **"cheap" and "rich"** as used herein generally refer to a security or asset class that is deemed to be substantially under- or overpriced compared to both its historical average as well as to the investment manager's future expectations. There is no guarantee of future results or that a security's valuation will ensure a profit or protect against a loss.

CPI is the Consumer Price Index.

The **credit quality** of a particular security or group of securities does not ensure the stability or safety of an overall portfolio. The quality ratings of individual issues/issuers are provided to indicate the credit-worthiness of such issues/issuer and generally range from AAA, Aaa, or AAA (highest) to D, C, or D (lowest) for S&P, Moody's, and Fitch respectively.

Dividend yield is represented by the weighted average coupon divided by the weighted average price.

Duration is the measure of a bond's price sensitivity to interest rates and is expressed in years.

Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.

Forward curve is a function graph that defines the prices at which a contract for future delivery or payment can be concluded today.

Fallen angel is a bond that was initially given an investment grade rating but has since been reduced to below investment grade status.

GFC is the Global Financial Crisis.

Information ratio is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns.

Like-duration Securities are calculated by the index provider by comparing the index return to a hypothetical matched position in the security.

LNG is Liquefied Natural Gas.

The **Option Adjusted Spread (OAS)** measures the spread over a variety of possible interest rate paths. A security's OAS is the average return an investor will earn over Treasury returns, taking all possible future interest rate scenarios into account. The OAS is the net spread over the swap curve that will on average be earned if the security is held to maturity.

Rising star is the term given to a bond that was rated high yield but has since been upgraded to investment grade.

"Risk assets" are any financial security or instrument that are likely to fluctuate in price.

Risk premia is the return in excess of the risk-free rate of return an investment is expected to yield.

Roll yield is the yield that a futures investor captures as their long position in a futures contract converges to the spot price.

"Safe haven" is an investment that is expected to retain or increase in value during times of market turbulence.

"Safe Spread" is defined as sectors that we believe are most likely to withstand the vicissitudes of a wide range of possible economic scenarios. All investments contain risk and may lose value.

The **SEC yield** is an annualized yield based on the most recent 30 day period. The subsidized yield includes contractual expense reimbursements and it would be lower without those reimbursements. The

Unsubsidized 30 day SEC Yield excludes contractual expense reimbursements.

Tracking error measures the dispersion or volatility of excess returns relative to a benchmark.

To relate the price sensitivity of ILBs to changes in nominal yields, yield beta is applied to nominal changes to arrive at a price sensitivity of ILBs to changes in nominal rates. A **yield beta** of 0.90 implies that if nominal yields move 100 basis points, real yields will move 90 basis points. ILBs with long maturity may respond differently to changes in nominal rates than shorter maturity ILBs.

The distribution yield for monthly paying Funds is calculated by annualizing actual dividends distributed for the monthly period ended on the date shown and dividing by the net asset value on the last business day for the same period. The distribution yield for quarterly paying Funds is calculated by taking the average of the prior four quarterly distribution yields. The quarterly distribution yields are calculated by annualizing actual dividends distributed for the quarterly period ended on the most recent quarterly distribution date and dividing by the net asset value for the same date. The yield does not include long- or short-term capital gains distributions.
